Thanks so much!

In your discussions, can you also check to see if there are updated files for the third proposed acquisition plan of 72,500 acres as well as the 180,000 acre proposal? I just saw a map by the Everglades Foundation and they had slightly different boundaries...

Hi Gabe,

I'm a graphics editor at The New York Times. I am hoping you can help me get some shape files that show all 187,000 acres of U.S. Sugar land as well as land owned by Florida Crystals.

When we did a story earlier this year in April, Brenda Duffey and Jessica Santiago helped me with shape files showing

the new and old land acquisition proposals. I still have those files, but would also like to show all of the U.S. Sugar and Florida Crystals properties.

Please let me know if you can help.

Thanks so much!

Haeyoun
